
SUMMARY

Backend Software Engineer with 3+ years of experience building **scalable backend and microservice-based systems** across fintech, healthcare, and enterprise monitoring platforms. Strong expertise in **Java (Spring Boot)**, **REST/SOAP APIs**, **system integrations**, and **distributed systems** supporting high-availability production environments. Experienced in **financial transaction workflows**, **secure APIs (OAuth2/JWT)**, and **enterprise integrations**. Comfortable in **Agile/Scrum teams**, contributing across the full lifecycle: development, testing, CI/CD, deployment, and production support.

EXPERIENCE

Software Engineer - Consultant | [Meliora Technologies Limited](#) | Nairobi, Kenya | Sep 2025 – Present

- Developing **backend microservices and APIs** for a large-scale EdTech platform, supporting digital learning workflows and student management systems.
- Designing and implementing **RESTful APIs and backend integrations** connecting platform services and external systems.
- Managing **application deployments, environment configuration, and containerized delivery using Docker-based workflows**.
- Leading **backend code optimization and refactoring initiatives** to improve performance, scalability, and maintainability.
- Implementing **secure service communication and authentication mechanisms** to ensure platform security and data integrity.
- Troubleshooting production issues, performing **system debugging and performance analysis**, and implementing improvements to ensure **platform stability and reliability**.
- Collaborating with cross-functional teams in an **Agile development environment**, contributing to sprint planning, reviews, and continuous delivery.

Lead Software Engineer | [Envisage Mobile](#) | Nairobi, Kenya | Jan 2025 - Present

- Designed and implemented **microservice-based backend systems** for healthcare and payments platforms serving 5,000+ users.
- Built and maintained **REST/SOAP integrations** with internal and external systems.
- Implemented **secure APIs (OAuth2/JWT)**, ensuring compliance with enterprise security standards.
- Developed **transaction workflows and SQL-backed pipelines** for operational reporting and reconciliation.
- Improved **performance** through query optimization, monitoring, and log analysis (~112ms latency).
- Implemented **Docker deployments and CI/CD pipelines**, ensuring release reliability.
- Provided **production support**, performing root cause analysis and system improvements.
- Authored technical documentation and mentored junior engineers on **clean, testable code**.

Software Engineer Intern | [Meliora Technologies Limited](#) | Nairobi, Kenya | 2024

- Developed **backend services and enterprise APIs** using Java and Spring-based architectures.
 - Built **monitoring and alerting platforms** used by banks and enterprise organizations, improving system visibility and reliability.
 - Designed **SQL-based data models and analytics pipelines** for KPI tracking and enterprise reporting.
 - Implemented **logging, monitoring, and alerting mechanisms** to maintain high system availability.
 - Integrated backend systems with **external enterprise platforms via REST APIs and messaging protocols**.
 - Participated in **Agile Scrum development processes**, including sprint planning, code reviews, and retrospectives.
 - Supported **incident management and troubleshooting of production systems**, improving platform resilience.
-

SKILLS

- **Backend & System Design:** Java (Spring Boot), REST & SOAP Web Services, Microservices, Event-Driven Architecture), System Integrations, File-Based Data Integration, API Design, Data Mapping & Transformation
 - **Databases & Messaging:** PostgreSQL, MySQL, NoSQL concepts, Apache Kafka, Redis (caching, queues, rate-limiting)
 - **Cloud & Containerization:** Docker, Kubernetes, CI/CD pipelines (GitHub Actions, Jenkins), Cloud platform familiarity
 - **Observability & Reliability:** Root Cause Analysis (RCA), Monitoring, Logging & Performance Optimization
 - **Security & Compliance:** OAuth2/OIDC, RBAC, Encryption (at rest & transit), Audit Logging, Secure Data Handling
 - **Soft Skills:** Mentorship, Cross-functional Collaboration, Agile Methodologies, Clear Communication
-

EDUCATION

Jomo Kenyatta University of Technology, Juja, Kiambu

Bachelor of Science in Computer Technology

- **Relevant Coursework:** Data Structures and Algorithms, Database Management Systems, Networking (TCP/IP), Web Development, Management Information Systems, Parallel and Distributed Systems
